5.

2.

4.

6.

1. COMBED COTTON

Our bread and butter. Our combed cotton is made from long fibres with a fine weave making it ideal for printing – the best in the market. We produce this in various weights: 120, 130, 150, 160, 180 and 220 GSM.

2. ORGANIC COTTON COMBED

We are really excited to be extending our range of products made from this eco-friendly fabric. This cotton has been grown without the use of herbicides or pesticides. See page 6 for our range of organic products.

3. COTTON CARDED

Carded cotton has not had its fine top layer shaved off and is made from shorter fibres. The result is not as soft as our combed cotton but is durable and more cost effective. We use this for our price-point Block Tee and Base L/S Tees.

4. COTTON/POLY BLEND

We have just developed a new fabric that requires less polyester to achieve the popular 'marled' look making for a softer, more cotton-rich result. Check out our new mid-weight Staple Marle Tee.

5. COTTON/POLY FLEECE

We use an anti-pill, cotton-rich polyester blend for our heavier weighted sweatshirts. Our most popular being the 350 GSM Stencil Hood which is 80% cotton 20% polyester.

6. COTTON/POLY French Terry FLEECE

For our lighter weight sweats like our Brush Crew we prefer a 75% cotton 25% polyester anti-pill French Terry fleece blend. The French Terry construction makes it more breathable than a standard poly-blend fleece.

OUR FABRICS.

7.

9.

8.

10.

11.

7. COTTON FRENCH TERRY

We've recently introduced cotton French Terry in a new range of premium sweatshirts. Heavy weight and 100% cotton meaning they are warm but breathable. The medium sized loop back gives a softness to an otherwise heavy fabric.

8. COTTON OXFORD

Our most popular shirts are our Oxford's which we make in both Mens and Womens styles. Cotton oxford is pure cotton in a tight gauge basket weave making it super durable.

9. POLYESTER RIP-STOP

Polyester rip-stop is an easy-to-wear light weight and water resistant fabric. We've used this in a long favourite of ours – the Cyrus Windbreaker as well as newcomer the Section Zip Jacket.

10. COTTON CANVAS

Our three styles of tote bags are made from premium 100% cotton, heavy weight canvas with a durable, plain weave making for the perfect printing surface.

11. COTTON DRILL

We use cotton with a drill weave in our heavier outerwear products. To allow for a slight stretch in our pants we add a small amount of elastane to this fabric for comfort.

OUR COLOURS - MARLES / WASHES.

Our range has more than 70 colours and is ever expanding. This colour chart provides approximate examples of the colours; providing equivalent Pantone colour names (Pantone Matching System®, PMS colours) for our solids for your reference.

Some colours can't be accurately reproduced because of the unique characteristics of certain fabrics; when possible, please refer to an actual garment.

—

Most of our marle fabrics are a polyester/cotton blend where the fabric is dyed after it has been knitted. The polyester thread doesn't absorb the dye creating the marle effect. With our 100% cotton marles the yarn is dyed first and afterward knitted into fabric with a contrasting yarn to create the marled look.

Our Stone Wash fabrics have been treated to produce a faded, vintage appearance.

S O C I A L R E S P O N S I B I L I T Y .

At AS Colour we recognise our responsibilities to workers for the conditions under which our products are made. We only work with factories that can assure audit-able standards of safe, fair, legal and humane working conditions. Aiming for transparency and traceability at all levels of our supply chain – we are proud to be certified by the following compliance programmes.

BETTER COTTON INITIATIVE.

The *Better Cotton Initiative* exists to make global cotton production better for the people who produce it, better for the environment it grows in and better for the sector's future. BCI aims to transform cotton production worldwide by developing *Better Cotton* as a sustainable mainstream commodity.

AS Colour is committed to improving cotton farming practices globally with the Better Cotton Initiative (BCI).

Through joining the community we will be contributing to the training of farmers and encouraging the worldwide shift to more sustainable cotton production.

BCI aims to transform cotton production worldwide by developing Better Cotton as a sustainable mainstream commodity.

AS Colour is committed to sourcing 50% of our cotton as Better Cotton by 2023.

BETTER COTTON INITIATIVE.

OEKO-TEX® is one of the world's best-known labels for textiles tested for harmful substances. It stands for customer confidence and high product safety.

OEKO-TEX® Standard 100 certified, ensures that products are free from dangerous substances—chemicals like pesticides, heavy metals, formaldehyde, and undesirable surfactants. The certification is designed to ensure the effect the dyeing industry has on the environment is minimised and the garments are safe for consumers as well as the people who make and sell them.

100% of our products from Bangladesh are certified by OEKO-TEX and 95% of our China Dye houses are also certified by OEKO-TEX® Standard 100.

The OEKO-TEX® Standard 100 is a testing certification for numerous harmful chemicals, even if they are not yet legally regulated. The certification of products in accordance with OEKO-TEX® Standard 100 is that all parts of an article meet the required criteria.

REEMI.

Reemi is a social enterprise and non-profit that exists to see humans flourish everywhere, with 100% of their profits going towards helping others. Reemi focuses on women's health because they believe it is under-prioritised in the garment industry, even though the majority of workers are female. For Reemi this begins with menstrual health, providing educational and sustainable products that work for all cultures.

They are developing innovative products and avenues to educate, helping provide access to environmental and culturally appropriate, hygienic solutions.

"We're so inspired and encouraged that you and your team have gone the extra mile to really see us fly in 2020! I've seen firsthand just how good your factories are and the significance of investing into long term relationships with factory owners.

I want to applaud and thank you for going beyond the factory four walls and investing in the lives of garment workers. Community creates change and we're stoked to welcome AS Colour into your whānau". - Emily & Ashleigh of Reemi.

AMFORI BSCI.

Amfori BSCI (Business Social Compliance Initiative) provides a single point for all supply chain performance information. By sharing monitoring activities' results, we reduce effort, save money and increase consistency in the buying and supply process. Amfori BSCI offers a range of practical auditing tools to help manage our risk and effectively monitor our supply chain.

As a relatively small brand, it is at times hard to apply leverage with suppliers. Through joining this organisation we should be able to learn from and communicate with

global like-minded brands that are able to apply both more leverage as well as resources into transforming the industry.

The Amfori BSCI Auditing Integrity Programme aims to maintain transparency and reliability in our monitoring process. Assisting us with the challenges of the future, the programme provides a comprehensive, robust and independent acceptance process for audit companies to engage with amfori BSCI activities and ensure excellence in audit quality at the audit company and auditor level.

To read more about our production processes and standards, read AS Colour's *Ethical Production Guide* online.

ORGANIC COTTON.

Is Our Cotton Sustainable?

This is our ultimate goal, but the cotton industry still has a long way to go to achieve this.

Australian cotton is used in 30% of our products. Australian cotton farmers claim to be the most efficient in the world, achieving in the last 10 years a 40% increase in their water productivity and 90% decrease in the use of pesticides. We are now collaborating directly with the Cotton Australia industry body to educate ourselves, as well as to track their progress in achieving their goal of becoming the producer and supplier of the most environmentally and socially responsible cotton in the world.

GLOBAL ORGANIC TEXTILE STANDARD.

Traceable GOTS (Global Organic Textile Standard) licensed organic cotton is used in approximately 8% of our products. Organic cotton is grown without toxic chemicals, using growing systems that replenish and maintain soil fertility while using less water. The main benefit of an organic cotton product is that crops aren't treated with pesticides, insecticides, herbicides or genetic modifications.

Benefits of Organic Cotton

Reduces environmental footprint

No toxic chemicals are used in the growing of organic cotton. It doesn't damage the soil, has less impact on the air, and uses 71% less water and 62% less energy. Conventional cotton uses about 16% of the world's insecticides and 7% of pesticides.

Model for the future

By 2025, two-thirds of the world's population may face water shortages. But organic cotton is 80% rain-fed, which reduces pressure on local water sources. The absence of chemicals also means that water is cleaner and safer. Cotton is often grown in water-scarce areas using irrigation and it takes 2,700 liters of water to make a conventional cotton t-shirt.

Fair price for sustainability

When you buy organic cotton you are investing in water conservation, cleaner air, better soil and farmer livelihoods. The price for organic cotton is therefore sometimes, but not always, higher. However, with demand on the rise, more choices will become available.

Promotes safe work & better livelihoods

Growing organic cotton keeps farmers and their families safe. They are not exposed to toxic chemicals in the field or through their food and water supply. It also means farmers grow more than one crop which supplements their food and income.

Impacts our food system

Organic cotton is grown from organic cotton seeds. Cotton seed oil is used in a variety of food products such as cookies, chips and vegetable oil, and is also fed to livestock. So while cotton fiber is not something we put in our body, the by-product can make its way into our diets.

You can make a difference

Caring for the world and the people we share it with is a life choice. Choosing organic cotton is part of this choice. In 2015, 26 million metric tonnes of cotton was produced globally, much of it for the apparel industry. Organic cotton makes up less than 1% of this. By choosing organic over conventional cotton you have the purchasing power to influence brands, manufacturers and even farmers. So let's change this number.

ascolour.
organic.

We've been working on expanding our range of Organic products, adding an organic option to some of our most popular styles – Staple & Maple Tees, Barnard Tank and Base L/S Tee.

The yarn used in this line of products is grown without the use of herbicides or pesticides and is certified by **GOTS** (Global Organic Textiles Standards). Our organic garments have been certified '**Organic 100**' by **OCS** (Organic Content Standard) guaranteeing that they are made from no less than 95% organic material.

Our factory uses certified production lines to manufacture our organic products – everything from dyeing using organic pigments to knitting and the treatment of waste water is compliant with **GOTS + CUC** (Control Union Certificate) environmental processing regulations.

BARNARD ORGANIC TANK - 5025G.

Regular fit, crew neck
